LEGISLATURE LIB
JUL 1 1 1975

Report of Chairman and Executive Director

Nineteen seventy-two presented to the University of Alberta Hospital more than its share of difficulties and problems or, to look at these in a positive sense, more than its share of challenges and incentives to better performance in the future. Some of the problems facing the hospital in earlier years are still unresolved and have grown more acute with the passage of time. Others appear to be in the process of resolution.

Centennial Hospital Project

The ongoing freeze on the Centennial Hospital Project has created a continuing and increasing degree of frustration and has lowered morale amongst the various groups of staff of the University Hospital. In an attempt to resolve some of the most urgent and acute problems arising out of this freeze, the Hospital Board met with representatives of the Provincial Government to express their serious concern and indicate the need for the rapid approval of changes which would to some degree ameliorate the problems. The Government recognized the hospital's concern and invited the Board to present a brief on these needs. At the same time the Government indicated that it had appointed a consultant to study the Centennial Hospital Project in the context of health care and health educational resources in the province. It was indicated that the consultant's report would not be available until the spring of 1974. In the meantime the Board appointed several committees to review the immediate and essential needs of the hospital for presentation to Government.

"Butler Building"

In recognition of the fact that some of the ambulatory programs which have a high priority in the changing delivery of care in the University Hospital from inpatient to outpatient services are being frustrated by lack of physical facilities, the Alberta Hospital Services Commission offered the temporary building presently being used by the Departments of Pathology and Bacteriology of the University of Alberta to the hospital for ambulatory purposes. The Board has reviewed the services which could be provided from this building following its release by the University in the summer of 1973.

Aberhart Hospital

Approval was received from the Alberta Hospital Services Commission to undertake major renovations to the Aberhart Hospital so as to enable it to be used for other patient care purposes than simply tuberculosis. These renovations were commenced in the spring of 1972 and are scheduled for completion in the summer of 1973. They will provide accommodation for poliomyelitis patients, a chronic respiratory unit, an expanded psychiatric unit for both inpatients and outpatients and, temporarily, for an auxiliary hospital unit.

Dietary Services

Because the delay in the Centennial Hospital Project has further compromised the dietary facilities of the University Hospital, the Board appointed a dietary consultant to review the food service systems within the hospital in an attempt to upgrade these to the degree possible within the present constraints, and taking into account the possibility of additional dietary facilities.

Modified Work Week

Another developmental study also planned during 1972 for implementation in 1973 consists of a Modified Work Week Project where staff in selected wards will work for 7 days in each two-week period for maximum shifts of 12 hours in length, and a total work period each fortnight of 80 hours. The staff in the units concerned are enthusiastic about the project which will evaluate quality and economics of service and staff satisfaction. This work will be done in co-operation with the Division of Health Services Administration.

Renal Dialysis

During the year the Renal Dialysis Program which, had operated within the University Hospital for a number of years, was approved as the Northern component of the Provincial Dialysis Program, with the University Hospital being the headquarters of the Regional Program. Dr. R. A. Ulan was appointed as Director.

The School of Nursing

During 1972 the Faculty of the School of Nursing developed and proposed a new curriculum for the School which would shorten the length of the Hospital Diploma Program in Nursing to two years and six months and would admit students three times rather than the traditional once a year. An application has gone forward to the Nursing Education Committee of the University's Co-ordinating Council to approve the new curriculum.

The Board also noted with concern the recommendations of the "Fast Report" that Diploma Programs be transferred to the College system and is working in co-operation with other hospitals having schools of nursing to demonstrate to Government that the remaining hospital schools in this province are of a high standard and are economically advantageous and should not be transferred from their present authorities.

Computer Services

The Hospital's computer program moved a further stage forward in the development of computerized processing of information relating to patients' admissions and discharges and it is hoped that this process will continue into 1973.

Volunteer Services

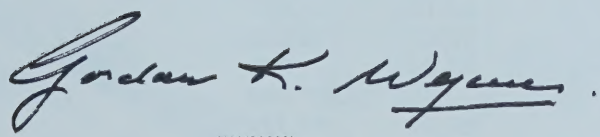
During 1972 the Volunteer Services under the auspices of the University Hospital Women's Auxiliary made a truly remarkable contribution in many areas for which the hospital expresses appreciation.

Board and Senior Staff Changes

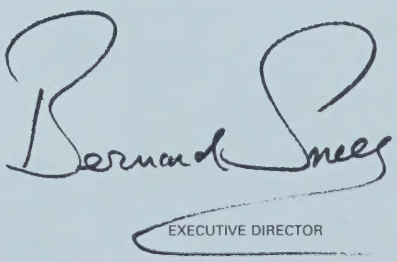
In February, 1972, Mrs. Thelma Gregg and Dr. Morris Weinlos were appointed to the Board of Governors of the Hospital.

The Board and the Administration of the hospital wish to express to all members of staff, medical staff and members of the various faculties of the University who work so closely with the hospital, their appreciation for the contributions they have made to the hospital.

As in previous years, detailed Departmental and Divisional Reports are provided in a larger volume available on request to those who are interested.



CHAIRMAN



EXECUTIVE DIRECTOR

Statistical Summary

BED DISTRIBUTION:

Medical	299
Surgical	372
Ophthalmology	27
Obstetrics and Gynaecology	126
Paediatric	106
Intensive Care	8

Rehabilitation and Polio	61
Tuberculosis	204
Total	1,267
Bassinetts Total	117

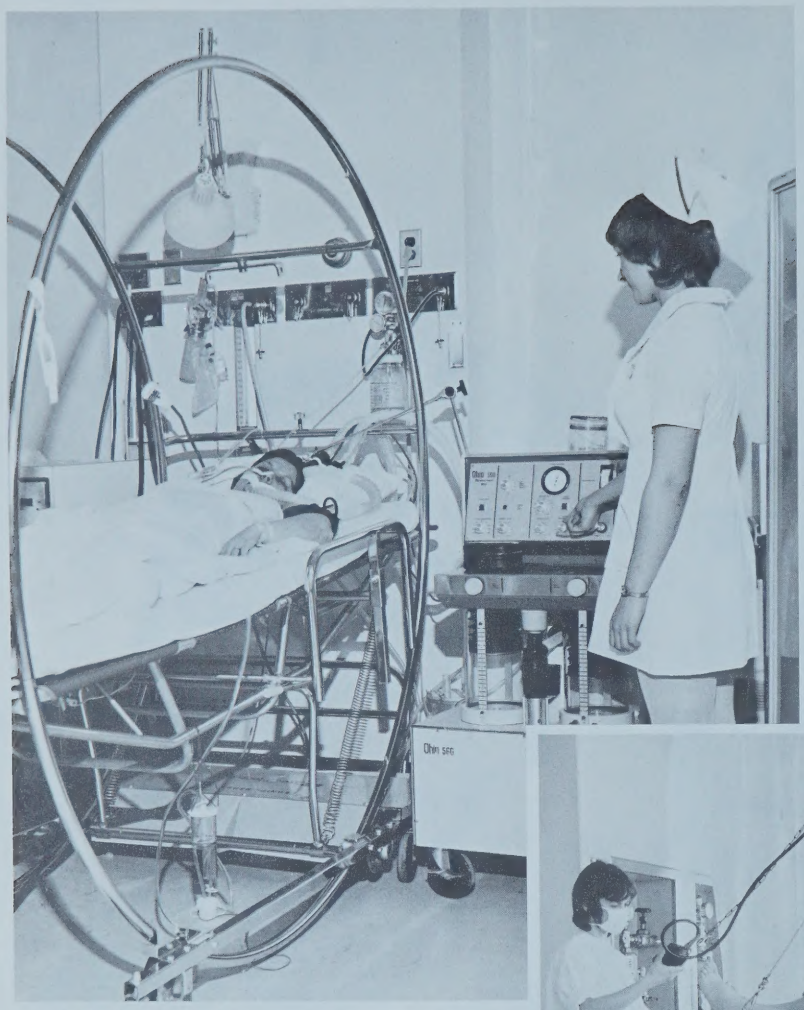
STAFF:

Medical Staff	181
House Staff	157
Hospital Staff	2,582
Total	2,920

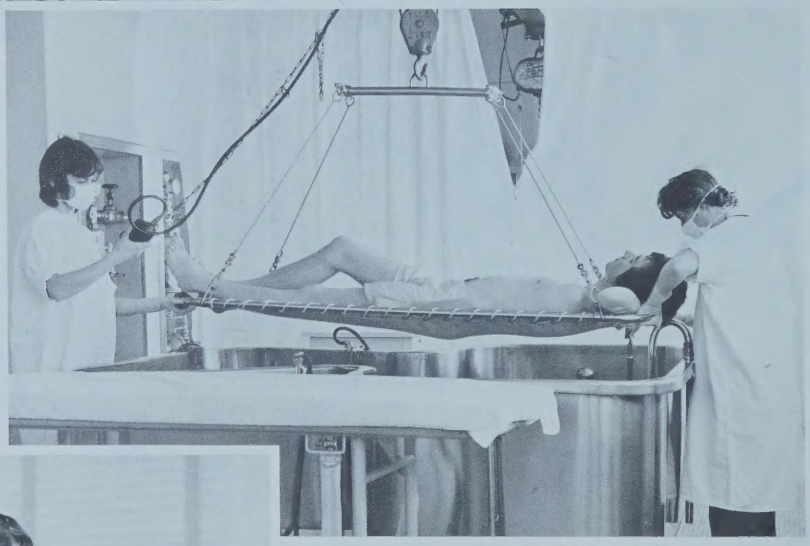
SERVICE STATISTICS:

	1971	1972
Patients Admitted	26,373	26,730
Births	2,026	1,891
Patient Days —		
Adults and Children	346,573	346,235
Newborn	15,980	15,384
Emergency Visits	68,089	71,645
Special Clinic Visits	54,122	55,689
Surgical Operations	20,590	20,969
Radiology Examinations	86,043	91,355
Laboratory Work Units	12,214,859	13,207,883
Physiotherapy Attendances	62,021	66,735
Occupational Therapy Attendances	20,318	17,420
Meals Served	2,009,373	1,924,905
Pounds of Laundry Processed	6,448,554	6,738,136

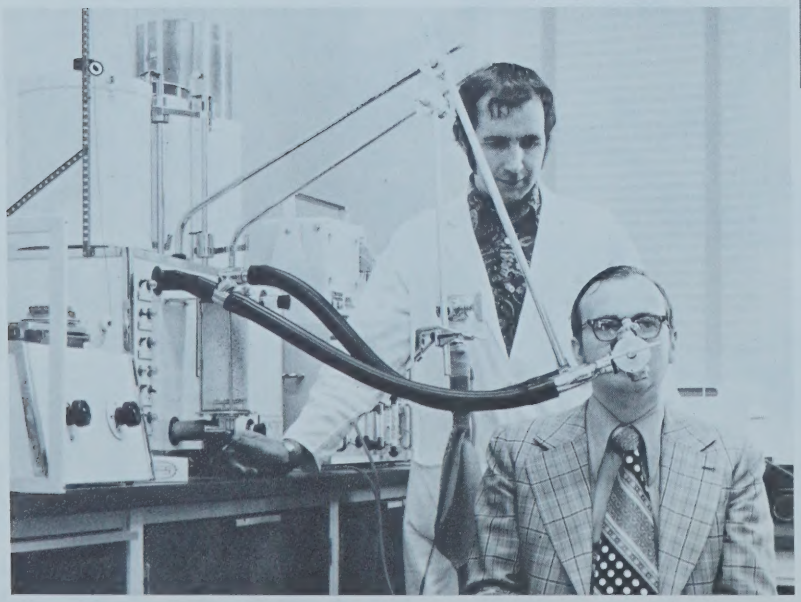
Young patient undergoing speech therapy.



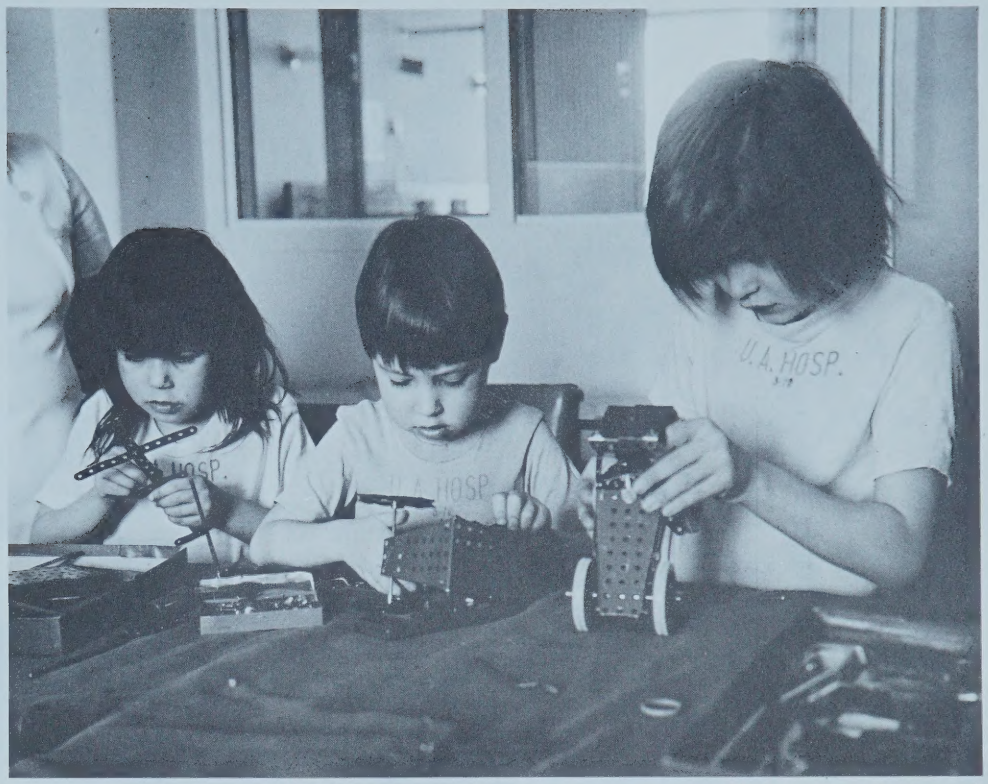
▲ Adjusting patient's respirator in Intensive Care Unit.



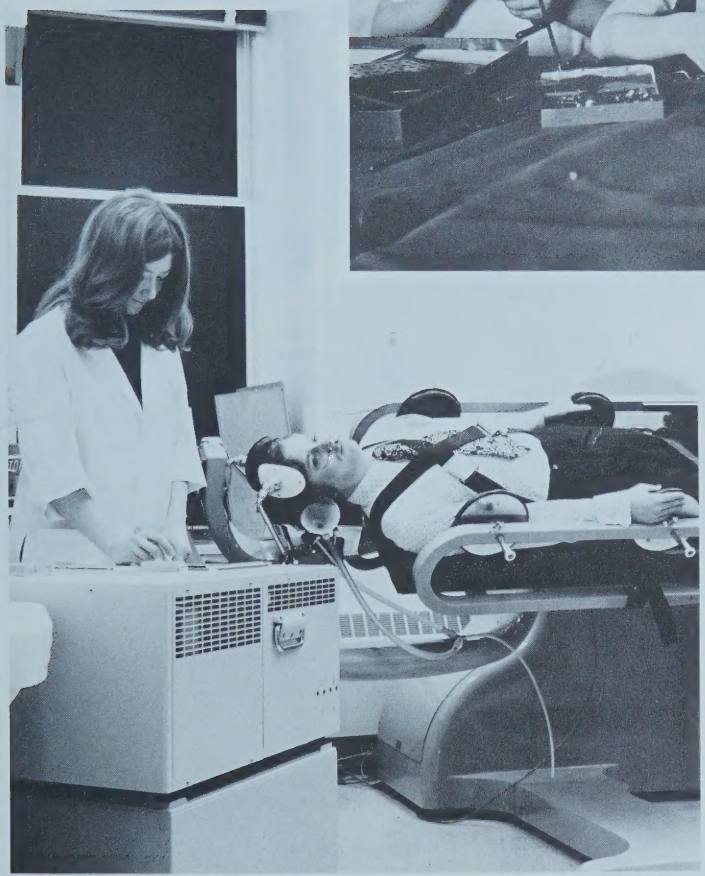
Patient being lowered ▲ into Hubbard Tank used in treatment of burns and bed sores.



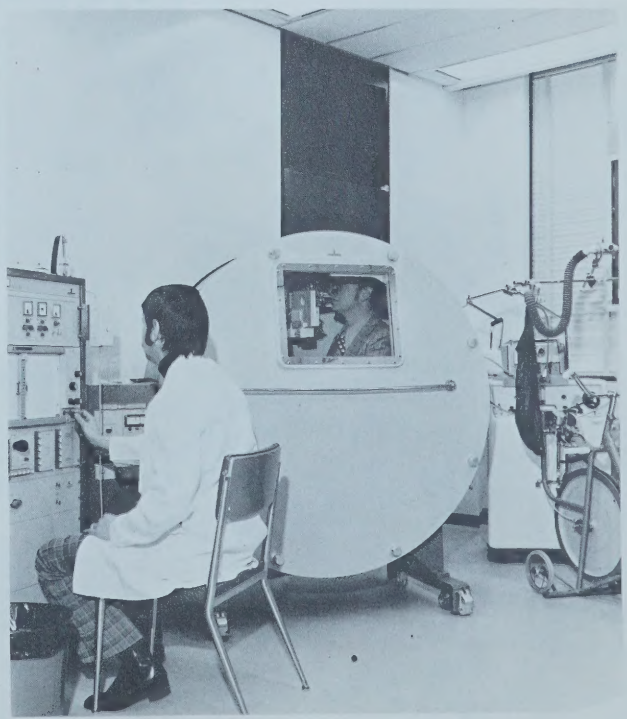
◀ Testing the general function of the lungs.



Three young patients working on mechanical projects. ▲



▲ An electronystagmograph test to aid in the diagnoses of vestibular and neurological disorders.



Body plethysmograph to measure airway resistance and lung volume. ▶

Positioning for radiological cerebral angiogram using rapid film changers.
